ACTIVITY LOG

PLACEHOLDER NAME - This is an auto-generated, unique filename given to all SPE assets uploaded to Media Landing

**UPLOADER DETAILS** - Metadata identifying time, user and vendor who initiated upload

TRANSACTION STATUS - Displays the status of file(s) as it is uploaded to Media Landing storage. Transaction Status and Placeholder Status will generally have different values

UPLOAD ASSET TYPE - Displays the type of asset the user should place in the drop zone

PLACEHOLDER STATUS - Displays the status of file(s) after it has been uploaded to Media Landing. Based on business rules, the file may receive additonal processing or be staged for additional workflows

ENCLOSING FOLDER - The main or root folder where media and session files are located

SUBFOLDER - The subfolder where media and/or session files are located. By clicking the Folder icon user can open and collapse the subfolder

MEDIA FILES - Individual media files contained in subfolder

SESSION FILE - Individual session files in Enclosing folder

PLACEHOLDER DETAILS - A combination of title and technical information that identifies the file destined for the Placeholder
